Use this form to **join this online class**. What is a Chakra? Chakra is a Sanskrit word meaning, "wheel", or "wheel of light". Our human bodies contain 7 major chakras that influence every organ and gland in our body. When one chakra is affected, the body as a whole becomes affected. This course will teach methods of activating, balancing, and cleansing the Chakra system. The Chakras form a holistic system within the body. When one chakra is affected, the others become affected as well. They all work together as one. Discover each chakra's name, color, mantra, element, sound, etc. The whole purpose of becoming familiar with the Chakra system is to help us integrate wholeness within ourselves. We can then bring physical, mental, emotional, and subconscious aspects of health into our lives.

## KAMMAH'S SPIRITUAL CENTRE

### First some theory!

The aura is a fluidum, radiated by minerals, plants, animals and us. We can compare the aura with the atmosphere of the Earth, because both consist of several layers, becoming gradually more delicate. The aura is a cocoon, surrounding our entire body. First it could only be seen by clear-voyant people, but it is now possible to make part of the aura visible by using Kirlian-photography. This is a technique which works with voltages up to 1,000,000 V, so we can see the different bodies of the aura. Kirlian-photo's show, that it is better not to treat food with chemicals, so it keeps its bio-energy. They also show that bio-energy decreases in time.

The most important function of the aura is to protect us from all kinds of negative energy from the outside, such as hatred or cold or the electricity from high-tension-wires. It is assumed that these can make you ill! The aura is the energy-spectrum of the cell's metabolism, meaning that a disease is a result of a wrong metabolism, and this can be seen in the aura far before you become ill!!! The aura is an electro-magnetic field that surrounds and protects us. But this does not happen quite well when you are ill; then there is a black hole at the place of the sick part of the human body... The aura has a strength of 100 W/m<sup>2</sup> skin.

### But how can it be damaged???

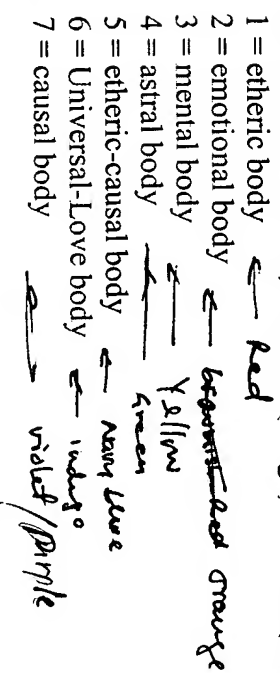

- \* by using para-normal powers in a wrong way
- \* by forcing these powers to become active (Kundalini-yoga)
- \* by magnetising in a wrong way (doesn't apply for Reiki)
- \* by living on Earth-radiation (use a copper number eight)
- \* being possessed by an evil spirit
- \* by using drugs (this also applies for coffee and tea!!!)

The aura turns around you and can be 28 cm thick (the person does not feel comfortable) up till 128 cm thick (the person feels comfortable). Therefore it is recommended that people always keep a distance of ca. 1 meter, otherwise one might feel uncomfortable or even threatened and this can result in a fight. This could explain the giant numbers of crimes in cities. There's not enough private space! The aura is a mixture of elementary parts, which gives it a time-independent base-color. When a color is bright, this is a good signal; a muddy color is some kind of pollution... Sun-bathing strengthens the aura.

## THE AURA

This is a schematism of the human aura...

We can see 7 bodies, from red (rough) to violet (delicate)

1 = etheric body (linked to the bottom-shakra)

Energy matrix with the same structure as the physical body, including all the organs. Also called the etheric-double. This body preceeds the physical body! It has a spinning web-structure, a grey or light-blue color and goes 0.5 - 5 cm out of the body. It pulses 15-20 times per minute.

2 = emotional body (linked to the spleen-shakra)

Looks like colored clouds of a fine substance, always flowing. Clear and strong emotions, such as love, joy, excitement and anger can be seen as bright colors; mixed emotions look dark and muddy. It goes 2.5-7.5 cm out of the body.

3 = mental body (linked to the navel-shakra)

Consists of delicate substances, each connected with thoughts and mental processes. It normally is a bright, yellow light, Concentrated thinking makes it bigger and brighter. It goes 7-20 cm out of the body and contains the structure of our ideas.

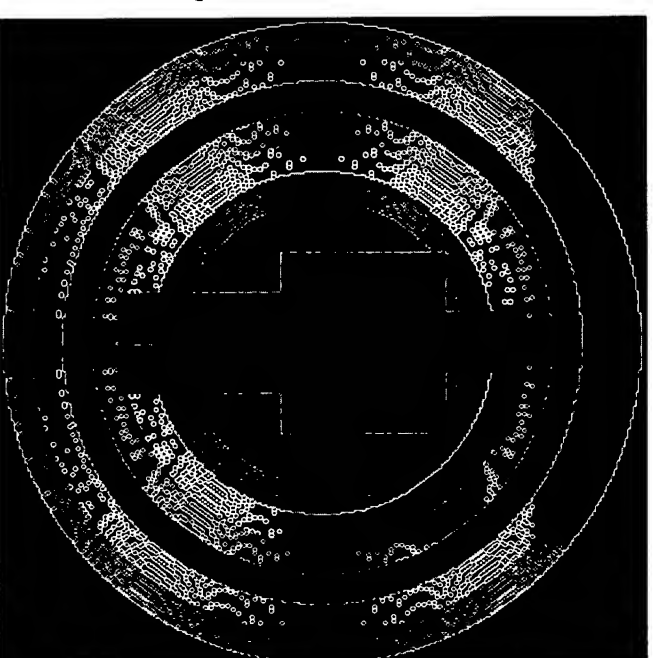

4 = astral body (linked to the heart-shakra)

It's amorph and consists of beautifully-colored clouds. On this astral level one can see pink cords between lovers! It goes 15-30 cm out of the body. Above this level there are creatures without a physical body !!!

5 = etheric-causal body (linked to the throat-shakra)

This is the matrix for the etheric level, which on it's turn is the matrix for the physical body. It goes 45-60 cm out of the body. On this level matter is created by sound and do sounds have the greatest healing power (Tibetan bowls !). The structure is transparant lines on a cobaltblue background.

6 = Universal-Love body (linked to the forehead-shakra)

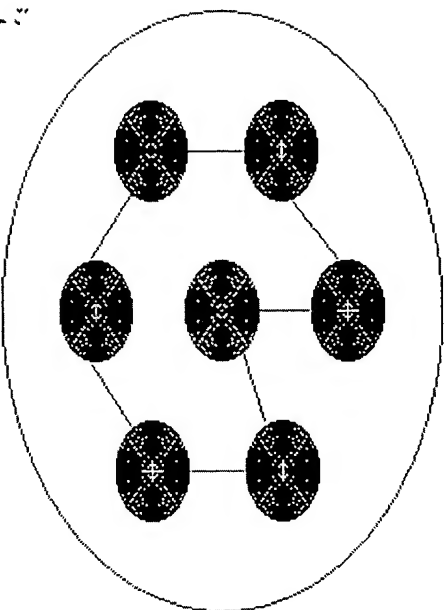

Causes a top-experience! It goes 60-80 cm out of the body. Unconditional love flows when there's a connection between the open heart-shakra and the open forehead-shakra. It's beautiful, glittering, pastel-colored light.

7 = causal body (linked to the crown-shakra)

If we are this, we're one with God !!! The outer-edge of this body gives the aura it's egg-shape. It consists of delicate gold-and-silver wires, which are very strong and hold the aura together. It has 'ties' with previous lives !!! Via our feet we have contact with the Earth-surface; this is our earthing. By using aura-healing we can try to recover a damaged aura. The Earth also has an aura, the van Allen-rings.

Everyone has not only a material body, but also an etheric body, an astral body and a mental body. When you die, your material body remains on Earth, while the higher body's evaporate out of it. This takes about three days; after that we may bury our dead... In the mirror-sphere, the micros will be emptied any further. The ethers of your etheric body go back to the etheric body of the Earth. Evenso, your astral forces and mental forces... This is the normal procedure. But if a person resists this way, he can prolonge his existence in the mirror-sphere artificially, by stealing ethers from the living persons on Earth From us !!! For example this is done in a spiritistic seance. In this, a friend or relative of the person who died, tries to make contact with his spirit, because he wants to ask something or wants to say sorry for something. If a spirit comes-through, he'll probably give correct answers, meanwhile tapping ethers from the people who join the seance. He has had his meal again... But problems can arise, if you're not able to send the ghost back; then it will probably haunt you!!! A psychic may provide the solution. He can make the ghost visible, he can reason with it and maybe persuade the ghost to go back...

#### THE SHAKRA-COLUMN (GRALE / SOESHOEMNA)

On the picture at the right, we can see the 7 most-important shakras and their position.

A shakra is a psi-vortex, because it takes psi (cosmic energy - look further) and passes it to the organs that lay behind the shakra.

They use it to remain healthy. A shakra also gives movement.

This means that reversing the spin of the shakras will give you spiritual and fysical freedom.

These shakras are from red to violet:

coccyx - shakra  
 spleen - shakra  
 navel - shakra  
 heart - shakra  
 throat - shakra  
 forehead - shakra  
 top - shakra

# SOMETING ABOUT PRANA (=VITALITY)...

We all need air, food, water and 3 kinds of prana

G-prana = need of love, with the el,part gluon and as a shakra the heart-shakra.

L-prana = information (otherwise Alzheimer!), with the el,parts foton and neutrino and top- and forehead-shakra.

P-prana = psi (cosmic energy from the Sun), with the el,part pranon and as a shakra the spleen-shakra. This will give you S-prana = a strong mind in a healthy body.

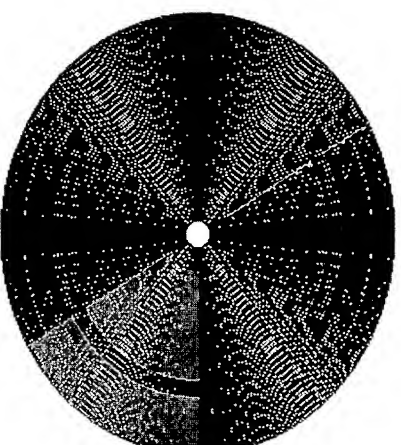

What is the pranon?

The pranon is the carrier of P-prana and it is produced by stars like our Sun. The pranon consists of six kinds of quarks, who stick together by gluons. This makes the pranon a quark/gluon-plasmogen. Because of this construction, any quark or anti-quark may have any color. The pranon has a load zero and a total mass of  $\approx 6700 \text{ MeV}$ . The spleen-shakra takes the pranon and distributes the quarks over the shakras, therefore we will look at this one first...

The forehead-shakra is connected with the hypo/fyse and the top-shakra with the pineapple gland. The top-shakra usually is the last one to become excited. It has a nucleus of 12 flowerleaves of less strength. First the top-shakra is a decline, but if one has established his state as a king of the divine light and one is liberal to anyone else, the shakra turns over and does not take energy anymore, but radiates energy !!! This shakra then is a real crown of majesty...

Also the Earth has its shakras !!! We can find these on crossings of leys (energystreams, that run across the planet). These shakras take also cosmic energy, and distribute it via the leys. Of the 12 shakras of the Earth, I name

earth-shakra at	country	works
Avalon	U.K.	+
Bermuda	Bermuda	-
Falicon	France	+
Sedona	U.S.A.	+/-
Stonehenge	U.K.	+

The positive shakras we can use very well for meditation.

The energy that goes through the leys we call Earth-radiation.

This energy may cause sleeplessness. Solution: Put a copper number eight under your bed...

## Crystal Singing Bowls and Your Chakras

[Jump to the chart of the chakras](#)

### What are chakras?

The word chakra (or as it is spelled in Sanskrit - Çakra - with the c pronounced as ch) means wheel, and originally referred to a chariot wheel. Later it became associated with the term "wheel of light" which is the modern usage of the word. The seven chakras were first described nearly 2600 years ago, in the ancient sacred texts known as the Upanishads. Most of the current Western knowledge of the chakras comes from an English translation of Sanskrit texts from the 10th and 16th centuries. It is interesting to note that the seven energy centers described so long ago actually have a basis in anatomy, they correspond to five main nerve ganglia of the spinal column and two areas of the brain (upper and lower). So in effect, they truly are "energy centers"! [Click here](#) for a more detailed (though technical) anatomical explanation of this phenomenon.

(Please note, clicking will open a new window. Close the window to return to this page.)

Please be aware that it is very difficult to capture the radiant sound of the bowls, and almost impossible to reproduce the vibratory resonant effect that they have on the body with a simple recording. The bowls simply must be heard live to truly experience them! We will be happy to play them over the phone for you!

## Why are chakras important?

### [Jump to the chart of the chakras](#)

Since chakras are indeed at the "center" of our physical bodies and involved with all of it's physical, mental, and emotional processes, it is easy to see why they are so important to our well-being.

If we have one or more chakras which are out of balance or "tune", then this can over time lead to physical, emotional or mental dis-ease. Keeping our chakras aligned and "singing" with the harmony that they are meant to have can lead to a sense of health and balance which can improve our lives on many different levels. For instance, if our heart chakra is unbalanced, then we may have difficulty forming good relationships with our loved ones, or it may leave us feeling little empathy for our fellow humans. Or on the other hand, we may be "too" emotional, and take things too much to "heart" which can lead to unnecessary suffering and worry. There is also some medical evidence that people who live happy lives have a decreased incidence of coronary heart disease, thus showing that a happy heart is a healthier heart! Understanding the relationships between our subtle bodies and our physical bodies can help us to lead happier and healthier lives.

## **Why Crystal Singing Bowls?**

### [Jump to the chart of the chakras](#)

Crystal Singing Bowls are a new twist on a very old idea. The original metal singing bowls first originated in Asia, and some scholars believe that they are a derivation of the ancient Buddhist begging or alms bowl from over 2500 years ago. In the Tibetan oral tradition, they are described as instruments of meditation. The haunting sound of a Tibetan metal bowl can be very peaceful and healing indeed.

Our modern Crystal Singing Bowls were originally manufactured as crucibles for the purpose of growing computer chips from liquid silicon, however their special properties were soon discovered and their potential for usage in modern healing methods was apparent. Today, our crystal bowls are designed specifically for use as healing tools and are in no way the "rejects" of the computer industry. Our bowls are made with a special patented process which makes them strong and

incredibly resonant. They are made of the purest quartz available. (99.992% pure)

Crystal Singing Bowls are tuned to the notes of the seven chakras, and we have found that by playing the bowls we can tune and balance our chakras to promote health and emotional well-being. We have provided several in-depth articles that cover these topics more thoroughly.
